DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1, 6, 11, 12, 20 and 21 are finally rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-193199.

JP`199 meets all of the limitations of claims 1 and 12, i.e., a lifting device **1** comprising a patient support **12**; a base plate **13**; a lifting linkage that connects the patient support to the base plate, the lifting linkage comprising two scissors assemblies **20, 30** connected to one another via a central articulation **42**, one of the two scissors assemblies comprising a pair of front scissors feet **31**; and a drive unit **50** directly coupled to the central articulation @ **42**, the drive unit being operable to adjust the height of the patient support and act on the central articulation, wherein the pair of front scissors feet are connected to the base plate in an articulated manner, and wherein the drive unit is arranged between the pair of front scissors feet **Fig. 2**, an axis of rotation of the front scissors feet extending through part of the drive unit @ **41**.

Regarding claims 6, 11, 20 and 21, JP`199 meets the limitations, i.e., rear scissor feet **32**; that run over the base plate connected via a slide **342** to run over a rail **343**.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 1, 6, 11, 12, 20 and 21 are finally rejected, in the alternative, under 35 U.S.C. 103(a) as being unpatentable over JP 11-193199.

JP`199 meets all of the limitations of the above claims, as described above, however, in the alternative and in order to expedite the prosecution, it does not disclose placing the drive unit between the front scissors feet at the base with an axis of rotation of the front scissors feet connected to the base to extend through a part of the drive unit. It would have been obvious to one having ordinary skill in the art at the time the invention was made to place the drive unit between the front feet at the base, for an alternative means of achieving the same results, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikes*, 86 USPQ 70.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

6. Applicant's arguments with respect to claims 1 and 12 have been considered but are moot in view of the new ground(s) of rejection.
